

Fecal Scoring Chart

Powered by AnimalBiome

Most Firm

Very hard and dry; requires much effort to expel from the body

Firm, but not hard; segmented in appearance

Log-shaped; little or no visible segmentation; moist surface

Moist, soggy log; loses form when picked up

Very moist, with a distinct shape; in piles rather than logs

Has texture, but no defined shape; present as piles or spots

Watery; no texture; flat puddles

Least Firm
